2018 has been a great year for our company. We managed to achieve a number of milestones:

- Completed two commercial feasibility (industrial) projects
- Completed one retrofit (industrial) project
- Started three industrial projects that will keep us busy until 2020
- Launched our software licensing service
- Received funding from NIA, Thailand
- Gave workshops-courses in USA, China, The Netherlands, Colombia, India and Thailand
- Involved in the organization of several international conferences
- Published more than 30 scientific papers with “PSE for SPEED” affiliation

If you are interested in commercial feasibility of new processing ideas, new products, retrofit or intensification options, please contact us for a fast, reliable and reasonably priced solution.

If you are interested in software tools for data (properties, solvents, aroma-chemicals, ionic liquids, ...), estimated properties of pure compounds and/or mixtures, process flowsheet synthesis-design (including automatic creation of input files for commercial process simulators), model development, chemical product design, process analysis, and, tailor-made software tool customized to your needs, please contact us.

We are happy to provide educational versions of our software tools free of charge if they are used for education and non-commercial research to educational institutions. If you are interested, please contact us.

Look out for our web-based property data retrieval and estimation (property on demand) tool to be launched soon in 2019. Also, we will launch several software tools: ProCAFD (flowsheet synthesis-design); ProCAPD (product design); LCSoft (life cycle assessment); ECON (economic analysis); ProCAPE (property prediction) and ProCACD (controller design-analysis).
